An outline of the state of Ohio in a light yellow color, with a green olive branch containing three olives positioned over the right side of the state.

M&A 2016

MICROSCOPY & MICROANALYSIS

July 24-28, 2016 • Columbus, Ohio

SAVE THE DATE

M&M 2016

 is July 24-28 in
Columbus, Ohio

Plan to attend and participate in the **largest meeting and exposition** dedicated to the science and application of microscopy and microanalysis.

The 2016 Executive Program Committee is **very excited** about the developing program! It will be packed with **great takeaway information** - short courses, tutorials, workshops, and special Outreach sessions - as well as product and services from **more than 120 exhibitors**. The scientific program includes **dynamic symposium topics**; many of which have been suggested by YOU - the members of the supporting societies - and will be highlights of the meeting.

Meeting and travel awards are available for students, post-docs and technologists. Watch for the printed **Call for Papers**, mailed with your November 2015 *Microscopy Today* magazine, and available on the M&M 2016 website in late October. (Paper submission portal will open **December 1, 2015**.)

As always, Society members will receive **reduced registration rates**. Visit the supporting society websites for membership information.

See you there!

M&M 2016 Executive Program Committee

Joe Michael, Sandia Laboratories

Jay Potts, University of South Carolina

Brian Gorman, Colorado School of Mines

Dan Dennies, Exponent Inc.
