

Microscopy Society of America DVD Library

Number	Title/Presenter	Year	Price
#1	The Transmission Electron Microscope 29 minutes/ B&W <i>Presented by Zeiss</i>	1982	\$8.00
#2	Using the LKB Knifemaker 17 minutes/ color <i>Presented by Plowman</i>		\$8.00
#3	Mikros Vacuum Evaporator 37 minutes <i>Presented by EM Lab Berkeley</i>		\$8.00
#4	Using the Wescor 5100 Osmometer 13 minutes/ color <i>Presented by EM Lab Berkeley</i>		\$8.00
#5	Electron Micrography 12 minutes/ B&W <i>Presented by Gambill</i>		\$8.00
#6	Sectioned Biological Material 16 minutes/ color <i>Presented by Anon</i>		\$8.00
#7	The Penetrating Eye 22 minutes/color <i>Presented by Hayes</i>	1970	\$8.00
#8	Introduction to SEM 57 minutes/color <i>Presented by Hayes</i>	1982	\$8.00
#9	Critical Point Drying 22 minutes <i>Presented by Humphries</i>	1977	\$8.00
#10	Particulate Sample Preparation 25 minutes/ color <i>Presented by Berkeley EM Lab</i>		\$8.00
#11	High Resolution Surface Replication 33 minutes/ B&W <i>Presented by Berkeley EM Lab</i>		\$8.00
#14	The Kleinschmidt Technique 22 minute/color <i>Presented by Hebert</i>		\$8.00
#15	Glycol Methacrylate Embedding for Light Microscopy 60 minutes/ color <i>Presented by Moe</i>	1980	\$8.00
#17	Introduction to Freeze-Fracture 77 minutes/ color <i>Presented by Schooley</i>	1982	\$8.00
#19	Weak-Beam EM 47 Minutes/color <i>Presented by VanderSande</i>	1977	\$8.00
#20	A lecture on Electron Channeling 47 minutes/ color <i>Presented by Davidson</i>	1978	\$8.00
#21	Preparation of Macromolecules for TEM 47 minutes/ color <i>Presented by Slayter</i>		\$8.00
#22	Preparation of Support Films for TEM 14 minutes/color <i>Presented by Pechak</i>	1980	\$8.00
#23	Basic Optics in SEM 40 minutes/ color <i>Presented by Crang</i>	1980	\$8.00
#24	Biological Procedures in EM 41 minutes/ B&W <i>Presented by Crang</i>	1971	\$8.00

Number	Title/Presenter	Year	Price
#26	Electron Microscopy. Principles and Practice 153 minutes/ B&W <i>Presented by Crang</i>	1975	\$8.00
#27	Operation of the JEOL 100C/CX TEM 75 minutes <i>Presented by Cummings</i>		\$8.00
#28	Stereology 52 minutes/color <i>Presented by Scales</i>	1982	\$8.00
#29	JEOL JSM-35 SEM Part I 36 minutes/color <i>Presented by Thurston</i>	1978	\$8.00
#30	JEOL JMS-35 SEM Part II 35 minutes/color <i>Presented by Thurston</i>	1978	\$8.00
#31	Fine Tuning Your SEM 56 minutes/color <i>Presented by Gaugler</i>	1982	\$8.00
#34	Theory of HVEM II 58 minutes/ B&W <i>Presented by Humphreys</i>	1982	\$8.00
#35	Theory of HVEM III 40 minutes/ B&W <i>Presented by Humphreys</i>	1982	\$8.00
#36	Theory of HVEM IV 57 minutes/ B&W <i>Presented by Humphreys</i>	1982	\$8.00
#37	Kinetic Studies I 57 minutes/ B&W <i>Presented by Loretto</i>	1982	\$8.00
#38	Kinetic Studies II 44 minutes/ B&W <i>Presented by Loretto</i>	1982	\$8.00
#39	Kinetic Studies III 74 minutes/ B&W <i>Presented by Westmacott</i>	1982	\$8.00
#40	Gas-Solid Interactions B&W <i>Presented by Kenik</i>		\$8.00
#41	Radiation Damage I 96 minutes/ B&W <i>Presented by Kiritani</i>	1982	\$8.00
#42	Radiation Damage II 50 minutes/ B&W <i>Presented by Merkle</i>	1982	\$8.00
#43	Radiation Damage III 45 minutes/ B&W <i>Presented by Merkle</i>	1982	\$8.00
#44	Radiation Damage IV 22 minutes/ B&W <i>Presented by King</i>	1982	\$8.00
#45	Introduction to Ultramicrotomy 36 minutes/ color <i>Presented by Schooley</i>	1982	\$8.00
#46	Colloidal Gold Labeling 112 minutes <i>Presented by DeMee</i>	1983	\$8.00
#48	Glass & Ceramics; Ion Milling 90 minutes/ color <i>Presented by Howitt</i>	1983	\$8.00

Number	Title/Presenter	Year	Price
#53	The Structure & Basic Operating Modes of a STEM 50 minutes/ color <i>Presented by Vander Sande</i>	1984	\$8.00
#54	How to Read a Convergent Beam Pattern 55 minutes/ color <i>Presented by Eades</i>	1984	\$8.00
#55	Energy Dispersive X-Ray Spectroscopy 52 minutes/ color <i>Presented by Hall</i>	1984	\$8.00
#57	High Resolution EM 55 minutes/ color <i>Presented by Gibson</i>	1984	\$8.00
#58	EELS in Biology 52 minutes/ color <i>Presented by Ottensmeyer</i>	1984	\$8.00
#59	Additives in Biological Fixation 76 minutes/ color <i>Presented by Boyles</i>	1984	\$8.00
#60	Rapid Freezing of Biological Specimens <i>Presented by Costello</i>	1984	\$8.00
#61	Cryoultramicrotomy 54 minutes/ color <i>Presented by Hagler</i>	1984	\$8.00
#62	Image Recording and processing 30 minutes/ color <i>Presented by Krakow</i>		\$8.00
#63	HVEM for Biologists 50 minutes <i>Presented by Gronsky</i>	1984	\$8.00
#67	Low Dose Imaging 63 minutes/ color <i>Presented by Downing</i>	1985	\$8.00
#68	Basic Mounting and Conductivity Considerations, Materials and Procedures prior to SEM Examination <i>Presented by Murphy</i>	1985	\$8.00
#71	Specimen Preparation for Near Surface Examination 48 minutes/ color <i>Presented by Horton</i>	1985	\$8.00
#72	Immunocytochemical Localization 49 minutes/ color <i>Presented by Pickel</i>	1985	\$8.00
#73	Energy Dispersive X-Ray Analysis 90 minutes/ color <i>Presented by Fiori</i>	1985	\$8.00
#74	Balzers 301 Freeze-Fracture Apparatus 55 minutes/ color <i>Presented by Rash</i>	1982	\$8.00
#76	Ultrapropane Jet Freezing 120 minutes <i>Presented by Gilkey</i>	1986	\$8.00
#77	Biological Applications of Cryo-SEM 57minutes/ color <i>Presented by Sargent</i>	1986	\$8.00
#79	Post-Shadow Labeling 40 minutes <i>Presented by Dinduk</i>	1986	\$8.00
#80	Molecular Cytochemistry of Freeze-Fracture <i>Presented by Pinta DeSilva</i>	1986	\$8.00

Number	Title/Presenter	Year	Price
#81	Principles of the SEM <i>Presented by Joy</i>	1986	\$8.00
#82	Contrast mechanisms in SEM <i>Presented by Newbury</i>	1986	\$8.00
#83	X-Ray Microanalysis 60 minutes/color <i>Presented by Fiori</i>	1986	\$8.00
#84	LaB6 in the TEM <i>Presented by Sewell</i>	1986	\$8.00
#87	High Resolution SEM <i>Presented by Peters</i>	1986	\$8.00
#90	CBED Total of 3 tapes 280 minutes <i>Presented by Eades</i>	1986	\$8.00
#91	CBED Approx. 300 minutes <i>Presented by Steeds</i>	1986	\$8.00
#92	CBED Approx. 280 minutes <i>Presented by Spence</i>	1986	\$8.00
#93a	CBED (1, 2, 3) <i>Presented by Bird</i>	1986	\$8.00
#93b	CBED (4, 5) <i>Presented by Bird</i>	1986	\$8.00
#94	Nuclear Microprobe Analysis 62 minutes/ color <i>Presented by Doyle</i>	1986	\$8.00
#98	Development of Beam-Forming System 27minutes/ color <i>Presented by Mulvey</i>	1986	\$8.00
#103	Microanalysis B.C. 31 minutes/ color <i>Presented by Heidenreich</i>	1986	\$8.00
#105	Basic Optics in TEM <i>Presented by McConville</i>	1987	\$8.00
#106	Electron Scattering <i>Presented by Vander Sande</i>	1987	\$8.00
#107	Contrast Mechanisms in TEM 57 minutes/ color <i>Presented by Hren</i>	1987	\$8.00
#109	Care and Use of Diamond Knives 56 minutes/ color <i>Presented by Bell</i>	1987	\$8.00
#110	EM of Nucleic Acids 47 minutes/ color <i>Presented by Beer/Varkey</i>	1987	\$8.00
#112	Preparation of Thin Foils for TEM 59 minutes/ color <i>Presented by Goodhew</i>	1987	\$8.00
#113	Image Recording in the EM 45 minutes/ color <i>Presented by Black</i>	1987	\$8.00

Number	Title/Presenter	Year	Price
#114	Making Every Electron Count. Detectors for SEM 39 minutes/color <i>Presented by McMullen</i>	1987	\$8.00
#115	Interview 29 minutes/color <i>Presented by LePoole/Zeitler</i>	1987	\$8.00
#116	Unknown Phases by ED/EDS 58 minutes <i>Presented by Carr</i>	1988	\$8.00
#117	Planar Interfaces & Defects 55 minutes/ color <i>Presented by Pond</i>	1988	\$8.00
#118	TEM Characterization of Precipitates 49 minutes/ color <i>Presented by Dahmen</i>	1988	\$8.00
#121	Confocal Scanning Light Microscopy 63 minutes/ color <i>Presented by Boyde</i>	1988	\$8.00
#127	High Spatial Resolution Microanalysis in the AEM 84 minutes <i>Presented by Garrett-Reed</i>	1989	\$8.00
#130	Colloidal Gold 18 minutes <i>Presented by Albrecht/Simmons</i>	1990	\$8.00
#132	Scanning Tunneling Microscopy <i>Presented by Chiang</i>	1990	\$8.00
#135	Quantitative Image Analysis 64 minutes <i>Presented by Russ</i>	1990	\$8.00
#136	Convergent Beam Electron Diffraction 51 minutes <i>Presented by Eaglesham</i>	1990	\$8.00
#137	Ultramicrotomy 50 minutes <i>Presented by Leica</i>	1990	\$8.00
#138	Sectioning for Serial Reconstruction 40 min <i>Presented by Kinnamon</i>	1991	\$8.00
#140	3-D IVEM Tomography <i>Presented by Agard</i>		\$8.00
#144	EM of Ceramics <i>Presented by Mitchell</i>	1991	\$8.00
#146	Confocal LM for Biology <i>Presented by Shuman</i>	1991	\$8.00
#147	Freeze Fracture of Membranes <i>Presented by Zampighi</i>	1991	\$8.00
#148	Fundamentals of ALCHEMI <i>Presented by Turner</i>	1991	\$8.00
#150	3-D Confocal Microscopy <i>Presented by Masters</i>	1992	\$8.00
#151	Fluorescence in situ Hybridization in Biomedical Research <i>Presented by J. Jerome</i>	1992	\$8.00

Number	Title/Presenter	Year	Price
#152	Atomic Force Microscopy <i>Presented by Fisher</i>	1992	\$8.00
#153	High Spatial Resolution Microanalysis <i>Presented by Romig</i>	1992	\$8.00
#158	Failure Analysis Methods for the Semiconductor Industry <i>Presented by Anderson</i>	1992	\$8.00
#159	Biometrics <i>Presented by Samakaya</i>	1993	\$8.00
#160	Cryopreservation <i>Presented by Costello</i>	1993	\$8.00
#161	SIMS in the Biological and Material Sciences <i>Presented by Linton</i>	1993	\$8.00
#162	Electron excited x-ray Microanalysis <i>Presented by Newbury</i>	1993	\$8.00
#163	Microstructure Characterization <i>Presented by Black</i>	1993	\$8.00
#164	Introduction to the Forgotten Art of Electron Diffraction Contrast <i>Presented by D. Maher</i>	1993	\$8.00
#166	Computer-aided Analytic & Visualizations Tools for Structural Studies <i>Presented by B. Carragher</i>	1993	\$8.00
#168	Recent Advances in Light Microscopy <i>Presented by B. Herman</i>	1994	\$8.00
#170	A Basic Introduction to Image Processing Using NIH Image <i>Presented by J. Mansfield</i>	1994	\$8.00
#171	Hitchhiker's Guide to Microscopy and Microanalysis using Telecommunications, E-Mail and the Internet Part I <i>Presented by N. Zaluzec</i>	1994	\$8.00
#172	Basic Literacy in Electron Probe X-ray Microanalysis with EDS: Qualitative & Quantitative Analysis <i>Presented by D.E. Newbury</i>	1994	\$8.00
#173	Introduction to Automated Particle Analysis 66 minutes <i>Presented by T.B. Vanderwood</i>	1994	\$8.00
#174	Introduction to Electron Holography <i>Presented by M. McCartney</i>	1994	\$8.00
#175	Exploring Local Properties of Biological Surfaces with the Atomic Force Microscope <i>Presented by J.H. Hoh</i>	1995	\$8.00
#176	Histochemical Methods for Localizing and Characterizing Cell and Tissue Glycoconjugates <i>Presented by B.A. Schulte</i>	1995	\$8.00

Number	Title/Presenter	Year	Price
#177	The Energy Filtering TEM (EFTEM) in Modern Biological Transmission EM <i>Presented by V.E. Bayer</i>	1995	\$8.00
#178	Hitchhiker's Guide to Microscopy and Microanalysis using Telecommunications, E-Mail and the Internet Part II <i>Presented by N. Zaluzec</i>	1995	\$8.00
#179	A Few Words on Bits and Bytes: A Tutorial on Image Spectral Processing for the Novice 120 minutes <i>Presented by J.F. Mansfield</i>	1995	\$8.00
#181	Atom-Probe Analysis of the Solid-State Liquid Interface 120 minutes <i>Presented by J.A. Panitz</i>	1995	\$8.00
#182	Image Processing and Analysis Fundamentals for Microscopy 120 minutes <i>Presented by B.D.Newell</i>	1995	\$8.00
#183	3-D Microscopy, Confocal, Deconvolution or Both 90 minutes <i>Presented by J.B. Pawley</i>	1996	\$8.00
#184	Ion Beam Milling Materials with Applications to TEM Specimen Preparation 90 minutes <i>Presented by R. Anderson</i>	1996	\$8.00
#185	Five Dimensional Microscopy using Wide Field Deconvolution: Practical Considerations and Biological Applications 50 minutes <i>Presented by W.F. Marshall</i>	1996	\$8.00
#186	3-D Microscopy using Confocal Microscopy 50 minutes <i>Presented by E.H.K. Stelzer</i>	1996	\$8.00
#197	Negative Staining: A Valuable Technique for Studying Subcellular Components <i>Presented by S.E. Miller</i>	1997	\$8.00
#198	Gamma Correction <i>Presented by J. Mackenzie</i>	1997	\$8.00
#199	Freeze Fracture at the Turn of the Century: Techniques for Visualizing and Labeling Tissues, Cells and Molecules <i>Presented by Yasamura & Rash</i>	1997	\$8.00
#200	Focused Ion Beam Milling for Site Specific TEM <i>Presented by L.A. Gianuzzi, J.L. Drown, S.R. Brown, R.B. Erwin & F.A.Stevie</i>	1997	\$15.00
#201	Practical Methods for TEM <i>Presented by K. Chien, R. Gonzalez, R. Heusser, H. Shiroishi & M. Heatherstraw</i>	1998	\$15.00
#202	Ethics in Digital Imaging <i>Presented by S. Silvers, J. Kinnamon, R. Mattson, S. Dunn</i>	1998	\$15.00
#203	The Development and Application of the Tripod Polishing Technique <i>Presented by J. Benedict, S. Kleipis and R. Anderson</i>	1998	\$15.00

Number	Title/Presenter	Year	Price
#204	Tech Forum - Instrumentation. How to Choose It and Use It: SPM and SEM <i>Presented by Russell & Lamberti</i>	1998	\$15.00
#205	Tech Forum - Instrumentation. How to Choose It and Use It: Designing a Microscopy Lab <i>Presented by Murphy</i>	1998	\$15.00
#206	Tech Forum - Instrumentation. How to choose it and use it: Microtomes and associated equipment - Confocals <i>Presented by Bozzola & Drazba</i>	1998	\$15.00
#207	Tech Forum Roundtable: Photoshop 101 <i>Presented by Multiple Speakers</i>	1998	\$15.00
#208	Outstanding Technologists Award Recipients <i>Presented by Multiple Speakers</i>	1998	\$15.00
#209	Miniaturized Artificial Machines in Biology <i>Presented by Multiple Speakers (2-DVD set)</i>	1998	\$15.00
#211	Transmission Electron Microscope Specimen Preparation of Metal Matrix Composites using the Focused Ion Beam Miller 80 minutes <i>Presented by P. Munroe, J. Cairney, R. Smith</i>	1999	\$15.00
#212	SEM at a Distance - Nuts & Bolts <i>Presented by S. B. Barlow</i>	1999	\$15.00
#215	The Basics of Microtomy for Materials Science Microscopy <i>Presented by T. Malis</i>	1998	\$15.00
#221	Single Particle Analysis of Macromolecules and Complexes: How to Get Started 60 Minutes <i>Presented by S J Ludtke</i>	2000	\$15.00
#222	Structural Analysis of Proteins on Lipid Substrates 1 hour <i>Presented by E M Wilson-Kubalek</i>	2000	\$15.00
#223	Guide to Three-Dimensional Reconstruction of Helical Structures <i>Presented by DeRosier</i>	2000	\$15.00
#224	Microscopy & Microanalysis Over The Net <i>Presented by N J Zaluzec</i>	2000	\$15.00
#225	Multi-Photon Excitation Microscopy: An Old Idea in Quantum Theory Applied to Modern Scientific Problems 90 minutes <i>Presented by D W Piston</i>	2000	\$15.00
#226	Energy Filtered Imaging <i>Presented by J. Bentley</i>	2000	\$15.00
#227	Atom Probe Tomography <i>Presented by M.K. Miller</i>	2000	\$15.00
#228	Tech Forum Roundtable: Safety Issues in the Microscopy Lab 60 minutes <i>Presented by S H Silvers, E. Boylston</i>	2000	\$15.00

Number	Title/Presenter	Year	Price
#229	Computational and Experimental Methods in Molecular Microscopy <i>Presented by N/A</i>	2000	\$15.00
#230	Cryo-Microscopy Part I <i>Presented by P. Echlin & K.L. MacDonald</i>	2000	\$15.00
#231	Cryo-Microscopy Part II <i>Presented by M. Marko, C-E Hsieh, B. Rath, C. Mannella, B. McEwen & A. Robins</i>	2000	\$15.00
#232	Cryo-Microscopy Part III <i>Presented by H. Gnaegi, O.L.Shaffer & M.S. El-Aasser</i>	2000	\$15.00
#233	3-D Visualization Tools <i>Presented by M.T. Dougherty</i>	2001	\$15.00
#234	Selective Staining, Contrast Enhancement for Biological Electron Tomography <i>Presented by M. H. Ellisman</i>	2001	\$15.00
#235	Building and Simulating High-Resolution 3-D Subcellular Models of Physiological Processes from Volume Data Sets <i>Presented by T. Bartol</i>	2001	\$15.00
#236	Topics in Electron Diffraction TEM <i>Presented by J.A. Eades</i>	2001	\$15.00
#237	Running a Multipurpose Microscopy Laboratory <i>Presented by C.E. Nockolds</i>	2001	\$15.00
#238	Variable Pressure SEM. How We Image with Them <i>Presented by B.J. Griffin</i>	2001	\$15.00
#239	Low Voltage SEM <i>Presented by David Joy & Donald Newbury</i>	2001	\$15.00
#240	ESEM/LV/VP: Imaging at Low Vacuum <i>Presented by Symposium</i>	2001	\$15.00
#242	Remote Microscopy in Shared and Teaching Facilities <i>Presented by Roundtable</i>	2001	\$15.00
#243	Spectral Imaging <i>Presented by P.T. Kotula & M.R. Keenan</i>	2002	\$15.00
#248	Scanned Probe Microscopy <i>Presented by P. Russell</i>	2002	\$15.00
#249	Electron Tomography <i>Presented by G. Sosinsky</i>	2002	\$15.00
#250	Basic Confocal Microscopy - Part I <i>Presented by J. Jerome & R. Price</i>	2002	\$15.00
#251	Basic Confocal Microscopy - Part II <i>Presented by J. Jerome & R. Price</i>	2002	\$15.00
#252	TEM & Polymers <i>Presented by J.S. Vastenhout</i>	2002	\$15.00
#253	Electron Backscatter Detection in SEM <i>Presented by J.R. Michael</i>	2002	\$15.00

Number	Title/Presenter	Year	Price
#254	Cellular Dynamics using AFM <i>Presented by T. Lehto, et al.</i>	2002	\$15.00
#255	Cryo-TEM of Large Complexes <i>Presented by S. Fuller</i>	2002	\$15.00
#256	Quality Systems for Microscopy & Microanalysis <i>Presented by E. Steele</i>	2002	\$15.00
#257	Electron Energy Loss Spectroscopy <i>Presented by R.F. Egerton</i>	2003	\$15.00
#258	Development of CCD-Based Digital Imaging for TEM <i>Presented by S. Peltier & J. Bouwer</i>	2003	\$15.00
#259	High Resolution TEM: Tomography - Principle & Practice <i>Presented by D.J. Smith</i>	2003	\$15.00
#260	Image Databases: What are they & What do they Bring to Microscopy <i>Presented by Jose Maria Carazo</i>	2003	\$15.00
#261	Creating Site Specific Training Tools <i>Presented by Steven B. Barlow</i>	2003	\$15.00
#262	Introduction to the SEM <i>Presented by David Joy & Donald Newbury</i>	2003	\$15.00
#263	More Basic Confocal Microscopy - Part 1 <i>Presented by J. Jerome & R. Price</i>	2003	\$15.00
#264	More Basic Confocal Microscopy - Part 2 <i>Presented by R. Price & J. Jerome</i>	2003	\$15.00
#265	More Basic Confocal Microscopy - Part 3 <i>Presented by J. Jerome & R. Price</i>	2003	\$15.00
#266	Techniques for Electron Tomography <i>Presented by M. Marko</i>	2004	\$15.00
#267	Energy Dispersive X-Ray Spectrometry in SEM <i>Presented by Dale Newbury</i>	2004	\$15.00
#268	Introduction to Electron Holography <i>Presented by Molly McCartney</i>	2004	\$15.00
#269	Introduction to Fluorescence and Image Correlation Spectroscopy <i>Presented by P. Wiseman</i>	2004	\$15.00
#270	Practical STEM <i>Presented by David Muller</i>	2004	\$15.00
#271	Building Order in Large Image Data Sets: Classification Techniques at Work! <i>Presented by J M Carazo-Garcia</i>	2003	\$15.00
#272	Computational Tools for Interpreting Electron Tomograms <i>Presented by N Volkmann</i>	2005	\$15.00

Number	Title/Presenter	Year	Price
#273	Confocal Microscopy System Performance: Spectroscopy and Foundations for Quantitation <i>Presented by R M Zucker</i>	2005	\$15.00
#274	Improved Electron Microscopy with Monte Carlo Simulations <i>Presented by R Gauvin</i>	2005	\$15.00
#275	In-situ Electron Microscopy: A Practical Tutorial <i>Presented by E A Stach</i>	2005	\$15.00
#276	Quantum Dots as Cellular Probes for Light and Electron Microscopy <i>Presented by T J Deerinck, B N G Giepmans, M H Ellisman</i>	2005	\$15.00
#277	Theory and Applications of Focal-Series Reconstruction in HRTEM <i>Presented by A Thust</i>	2005	\$15.00
#278	Fluctuation Electron Microscopy for the MASses <i>Presented by M M J Treacy</i>	2005	\$15.00
#279	Solve the Mystery (EM for kids) <i>Presented by Elaine Humphrey</i>	2005	\$15.00
#280	How to Use the Dual Beam FIB-SEM to Characterize Microstructure in 3-D <i>Presented by Micahel Uchic</i>	2006	\$15.00
#281	Tomographic Reconstruction with the IMOD Software Package <i>Presented by David Mastronarde</i>	2006	\$15.00
#282	Atom Probe Tomography and Applications to Understanding Nanotechnology <i>Presented by S.P. Ringer</i>	2006	\$15.00
#283	CCD Technology for Digital Image Capture on Transmission Electron Microscopes <i>Presented by Brent Bailey</i>	2006	\$15.00
#284	Microwave Processing in a Modern Microscopy Facility <i>Presented by Elaine Humphrey</i>	2006	\$15.00
#285	How to Convert 2-D Sectioning Images to a 3-D Data Set <i>Presented by M. De Graef</i>	2006	\$15.00
#286	Serial Sectioning in the Miceon Plus Range & Modern Techniques for Automation <i>Presented by Jonathan Spowart</i>	2006	\$15.00
#287	Cryoelectron Tomography <i>Presented by Nicastrò</i>	2006	\$15.00
#288	Early Times of Electron Probe Analysis <i>Presented by N/A</i>	1986	\$8.00
#289	Development of the Beam Forming System of the Electron Microprobe <i>Presented by N/A</i>	1986	\$8.00

Number	Title/Presenter	Year	Price
#290	Development of Electron Microprobe Analysis at Cambridge <i>Presented by N/A</i>	1986	\$8.00
#291	The Many Skills of Microprobe Analysis: Absorption Correction and ZAF Analysis <i>Presented by N/A</i>	1986	\$8.00
#292	Round Table Discussion <i>Presented by Castaing, Cosslett, Duncomb, Mulvey, Philibert</i>	1986	\$8.00
#293	Microanalysis B.C. <i>Presented by N/A</i>	1986	\$8.00
#294	Microanalysis at MIT: Development of Commercial Electron Microprobe <i>Presented by N/A</i>	1986	\$8.00
#295	Early Work on Microprobe Analysis in Japan <i>Presented by Shinoda</i>	1986	\$8.00
#296	Biological Electron-Probe X-Ray Analysis Development of Geological Applications <i>Presented by N/A</i>	1986	\$8.00
#297	Round Table Discussion <i>Presented by Hall Heinrich, Kell Wittry, Ogilvie Shimizu</i>	1986	\$8.00
#298	Tutorial: Nuclear Microprobe Analysis <i>Presented by Sandia National Labs</i>	1986	\$8.00
#299	High Pressure Freezing for Electron Microscopy of Biological Specimens. PLUS: Freeze Substitution Method: Tutorial and Roundtable Discussion <i>Presented by Stock, Studer, McDonald</i>	2007	\$15.00
#300	A Novel Sample Freezing Method <i>Presented by Leunissen</i>	2007	\$15.00
#301	Electron Tomography for Materials Science <i>Presented by Midgley</i>	2007	\$15.00
#302	LACsBI: incoherent Imaging for Quantitative TEM <i>Presented by Anderson</i>	2007	\$15.00
#303	Atomic Force Microscopy (AFM) and Related Microscopy Techniques and Applications <i>Presented by Russell</i>	2007	\$15.00
#304	Creating a Successful Scientific Presentation (Professional Development Tutorial) <i>Presented by Maleef</i>	2007	\$15.00
#305	Playing the Grant Game to Get the Toys (Instruments) We Want (Professional Development Tutorial) <i>Presented by Price</i>	2007	\$15.00
#306	X-Ray MicroCT <i>Presented by Stock</i>	2007	\$15.00

Number	Title/Presenter	Year	Price
#307	Cryo-Fluorescence: A Tool for Correlative Cryo- Light and Cryo- Electron Microscopy <i>Presented by Cindi L. Schwartz</i>	2008	\$15.00
#308	Live Cell Imaging Limitations <i>Presented by Simon Watkins</i>	2008	\$15.00
#309	Electron Backscatter Diffraction Operation and Applications <i>Presented by David Field</i>	2008	\$15.00
#310	Electron-Probe Microanalysis (EPMA:) An Overview for Beginners and a Status Report for Experts <i>Presented by Paul Carpenter</i>	2008	\$15.00
#311	Lorentz Microscopy -- A Versatile Technique for Studying Magnetic Multilayers, Elements and Nanowires <i>Presented by John Chapman</i>	2008	\$15.00
#312	Stereological Characterization of the Geometry of Three Dimensional Microstructures <i>Presented by Robert. T. DeHoff</i>	2008	\$15.00
#313	Image J, A Useful Tool for Image Processing and Analysis <i>Presented by Joel B. Sheffield</i>	2008	\$15.00
#314	Job Hunting for Scientific Professionals <i>Presented by Bev Maleeff</i>	2008	\$15.00
#315	Image Processing & Interpretation in Structural Electron Microscopy <i>Presented by Bernard Heyman</i>	2009	\$15.00
#316	Back to Basics: The Fundamentals of Cryo-Electron Microscopy <i>Presented by Terje Dokland</i>	2009	\$15.00
#317	Sample Preparation for Material Scientists <i>Presented by Hendrik Colijn</i>	2009	\$15.00
#318	Back to Basics: The Use of Transmission Electron Microscopy <i>Presented by Jan Rignaldi</i>	2009	\$15.00
#319	FIB Sample Preparation of Thin Films and Soft Materials <i>Presented by Andrew Minor</i>	2009	\$15.00
#320	Career Development for Scientific Professionals <i>Presented by Lucille Gianuzzi</i>	2009	\$15.00
